

Dear Parents and Guardians,

We would like to introduce you to a new program our school has acquired to help your child prepare for academic, career, and future success.

Say hello to Xello!

Xello is an engaging online program that helps students build the skills, knowledge and plans to be future ready. The program uses an investigative, discovery-based learning process. Students better understand themselves, their future career options, and the 21st century skills they'll need to succeed.

Here's how it works...

The Student Experience with Xello

With Xello, your child will:

- 1 Build Self-knowledge**
Define their interests, skills, preferences, and aspirations so they can explore the opportunities right for them.
- 2 Explore Options**
Learn about career possibilities and educational pathways by exploring rich, engaging content and lessons.
- 3 Create a Plan**
Your child can create dynamic actionable plans that outline the steps needed to achieve school, career, and life goals.
- 4 Learn & Reassess**
Interactive lessons help your child develop age appropriate skills and knowledge for success in school and beyond.

Parent Involvement

You're encouraged to explore Xello with your child by logging in together. Your child can log in to his or her account via desktop or mobile device to share what they've learned about themselves, the world of work, and their future options.

Safe and Secure Environment

We take data protection and privacy very seriously. So does Xello. The program complies with legal requirements for safety and security outlined in the Family Educational Rights and Privacy Act (FERPA). That means advertising is not displayed within Xello, nor is data used for commercial purposes. Xello is also a signatory of the Student Privacy Pledge, requiring them to uphold strict standards for safeguarding student privacy regarding the collection, maintenance, and use of student personal information.

You can learn more about Xello and the student experience by visiting www.xello.world

We hope you're just as excited as we are about this new program and making every student future ready.

How Students Share their Profile

In Xello, students have the option to generate a shareable link to their profile, which they can use to connect with friends, mentors, and more. Students can also share this link with their parents, who can then view their child's profile without needing a username and password. It's similar to the shareable link option in Google Docs.

Enabling the Shareable Profile

There are two ways for students to enable the shareable profile from the Student Experience:

1. On any page in Xello, from the top right corner, students click their avatar and select **Share your profile**.
 - Or, from beneath their name on the **About Me** page, students click **Share your Profile** to open a preview of their shareable profile.
2. From the top right corner of the profile, students click **Share**.
3. From the Share Your Profile window, switch the toggle to **ON** to get a shareable link.
4. Students can copy and share the link with parents or other people with whom the student wants to share their Xello profile.

Note: A unique URL is created when the user turns on the share option. It does not exist until that happens. There is no way to access the profile until this link is activated by the student. The student can also turn the link off.

Turn Off the Shareable Profile

If the student has shared the link with someone and no longer wants to allow access to their profile, they can unshare their profile. This will turn the link off for everyone.

Follow the same steps as above to switch the toggle to **OFF**.

FYI: If a student turns their profile off and then turns it back on again, a new link will be generated. This is important from a privacy point of view.
